

MUHAMMAD IDRIS ABUBAKAR

Software Engineer and Mobile App Developer

Kano, Nigeria | +234 704 252 6971 | abubakarmi131@gmail.com | abubakarmi.netlify.app | github.com/AbubakarMi | linkedin.com/in/muhammad-idris-abubakar-1853752a5

PROFESSIONAL SUMMARY

Results-driven Software Engineer and Mobile App Developer with 5+ years of experience, in the industry since 2020, building secure, high-performance systems across fintech, healthcare, government, education, transport, and hospitality. Proficient in C# .NET, Python, Django, ASP.NET Core, Node.js, Next.js, React.js, Flutter, PHP Laravel, EF Core, and PostgreSQL. Skilled in designing scalable REST APIs, implementing JWT authentication and role-based access control (RBAC), integrating AI model pipelines, and architecting compliant backend and mobile systems. Currently a remote Software Engineer at Book Direct, with prior experience engineering AI-driven healthcare products at Techserv Intelligence and fintech/government platform development at Hubuk Technology, alongside multiple concurrent freelance and founder-led ventures.

CAREER HIGHLIGHTS

- Shipped the Kano State Pension Management System, now live in production managing records for over 50,000 pensioners.
- Rebuilt KrediNou from a non-working app that had processed \$0 into a live fintech platform that has since processed and settled over \$73,869, and helped recover over \$12,299 in loans.
- Contributed as Full-Stack Developer to SFMP (Sustainable Finance Marketplace) at Hubuk Technology, a renewable-energy structured-finance marketplace built for Sterling Bank connecting borrowers, financiers, and administrators.
- Founded and architected Forge, an AI-powered payment validation engine, after personally cleaning a 30,000-beneficiary disbursement by hand.
- Led BizScan360 to 2,800+ users as a trusted Business Health Evaluation Platform for 500+ companies worldwide.
- Launched AbiiApp, a social super-app, now live on the Google Play Store and Apple App Store.

CORE SKILLS

Python, Django, ASP.NET Core (MVC & API), C#, JavaScript, Node.js, Express, PHP, Laravel, Flutter, PostgreSQL, EF Core, React.js, Next.js, Firebase Firestore, REST APIs, JWT, RBAC, Git, GitHub, Agile/Scrum, System Design, API Architecture

WORK EXPERIENCE

Software Engineer | Book Direct (bookdirect.ng), Nigeria (Remote) Sep 2026 – Present

- Software engineer on bookdirect.ng, a platform for booking from thousands of hotels and shortlet apartments across Nigeria, part of the Staylier Group.
- The platform is built with a Next.js frontend and a Node.js backend, pairing guest-facing search and booking with tools for hotel owners and shortlet managers.

Lead Developer (Part-time) | KrediNou (kredinou.com), Remote Feb 2026 – Present

- Joined when the existing app was not working and had processed \$0; rebuilt it and took it live. It has since processed and settled over \$73,869.
- Helped the business recover over \$12,299 in outstanding loans.
- Rebuilt it as a cross-border fintech platform with multi-currency wallets, P2P transfers, and remittance on an auditable double-entry ledger; now support it part-time with fixes and improvements.

Software Engineer | Techserv Intelligence, Enugu, Nigeria (Remote) May 2026 – Sep 2026

- Built and maintained backend services for Clinex and Vitalink, AI-driven healthcare products, using C# .NET, React, and PostgreSQL.
- Collaborated with cross-functional teams to architect scalable APIs and implement secure, role-based access control across platform modules.

Founder | Forge, Kano, Nigeria Jan 2024 – Present

- Architected Forge solo, an AI-powered bulk payment and disbursement platform for African businesses, using Python (AI layer), .NET backend, React frontend, and PostgreSQL.
- Engineered intelligent account validation, reducing bulk payment failure rates to near zero across large-scale datasets.
- Navigated pre-seed fundraising, investor negotiations, and accelerator applications while managing end-to-end product development.
- Produced full investor-facing materials: pitch deck, financial model, investment memo, and product demo.

Lead Developer | BizScan360 (bizscan360.com), Remote Nov 2025 – Mar 2026

- Led full-stack development of a business health evaluation platform trusted by 2,800+ users and 500+ businesses worldwide.
- Built automated KPI analysis, one-click PDF reports, and interactive dashboards with trend charts and anomaly detection using Next.js, Node.js, and PostgreSQL.

Backend / Full-Stack Developer | Hubuk Technology Limited, Kano, Nigeria 2021 – Aug 2026

- Progression: joined as a trainee (2021), Intern (2022), Junior Backend Developer (2023), Backend Developer (2024), Full-Stack Developer (2025).
- Architected and deployed scalable REST APIs with ASP.NET Core, reducing dev cycle time by 25%.
- Engineered JWT authentication and RBAC systems securing access across all platform modules.
- Delivered budgeting, payments, and analytics dashboards powered by PostgreSQL and EF Core.
- Shipped the Kano State Pension Management System (ASP.NET Core MVC), now in production managing records for over 50,000 pensioners.

- Contributed as Full-Stack Developer to SFMP (Sustainable Finance Marketplace), a renewable-energy structured-finance marketplace connecting borrowers, financiers, and administrators, delivered for Sterling Bank.
- Drove Agile ceremonies across frontend, backend, and mobile squads; authored full technical documentation.

Frontend Developer Intern | Torvix AI, Remote, India *Sep – Oct 2025*

- Developed reusable React.js components for an AI-powered workflow automation platform.
- Optimised component state management and improved performance across key automation modules.

Backend Engineering Intern | FlexiSAF Solutions Limited, Abuja, Nigeria *Sep – Dec 2025*

- Built backend features in Java and Spring; wrote optimised SQL for enterprise-grade modules.
- Collaborated with senior engineers to deliver secure, maintainable internal APIs and tools.

EDUCATION

B.Sc. (Hons) Computer Science | Aliko Dangote University of Science and Technology, Kano, Nigeria (Mar 2020 – Sep 2025)

Graduated with Honours. Coursework: data structures, algorithms, software engineering, database systems, computer networks, mobile application development.

KEY PROJECTS

Kano State Pension Management System | Live | 50,000+ Pensioners

Full-Stack Developer, Hubuk Technology Limited | ASP.NET Core MVC, PostgreSQL, EF Core

- Shipped a production pension administration platform for the Kano State Pension system, now managing records for over 50,000 pensioners.
- Built backend MVC modules and database schema for pensioner enrollment, data verification, and disbursement tracking.
- Delivered role-based admin dashboards enabling pension board staff to manage records, monitor verification status, and generate reports.

SFMP: Sustainable Finance Marketplace | Live

Full-Stack Developer, Hubuk Technology Limited | sterloan.hubuk.ng

- Contributed as full-stack developer to a renewable-energy structured-finance marketplace connecting borrowers, financiers, and administrators, built for and powered by Sterling Bank.
- Worked on platform features supporting the end-to-end structured-finance workflow between borrowers and financiers.

AbiiApp | Live | Google Play & App Store

Lead Developer, Infira Technology (Client Project) | PHP, Laravel, Mobile

- Led full-stack development of AbiiApp, a social super-app combining a mobile social network, AI-powered content moderation and ranking, an in-app wallet and marketplace, and a unified social inbox.
- Architected a Laravel backend integrating third-party social platform APIs (Facebook, Instagram, X, Threads, LinkedIn) into a single unified inbox experience.
- Secured and delivered the project end-to-end as a freelance contract through Infira Technology; now live on the Google Play Store and Apple App Store.

Vitalink | In Development | vitalink.tech

Software Engineer, Techserv Intelligence | C# .NET, React, PostgreSQL

- Smart patient monitoring and vital signs tracking platform with real-time health data pipelines and role-based clinician dashboards.
- Integrates with Clinex, Techserv Intelligence's broader AI-driven healthcare ecosystem.

Forge | Pre-Launch | forgeapis.xyz

Founder | Python, .NET, React, PostgreSQL

- AI-powered bulk payment and disbursement platform for African businesses. The Python AI engine validates and auto-corrects bank account details, then disburses clean data with near-zero failure rate.
- Founded after personally managing a 30,000-beneficiary disbursement requiring weeks of manual cleaning.

KrediNou | Live | \$73,869 Settled | kredinou.com

Lead Developer | Next.js, Node.js, PostgreSQL, REST APIs

- Cross-border fintech platform providing multi-currency wallets, transfers, credit scoring, and loan management. Rebuilt from a non-working app that had processed \$0; it has since processed and settled over \$73,869 and recovered over \$12,299 in loans.
- Designed and implemented the complete full-stack infrastructure: end-to-end encryption, RBAC for admin and applicant roles, and modular API architecture for future mobile integration.

BizScan360 | Live | 2,800+ Users | bizscan360.com

Lead Developer | Next.js, Node.js, PostgreSQL, REST APIs

- Business Health Evaluation Platform trusted by 500+ growing businesses worldwide, producing a clear 0-100 Business Health Score from complex financial data.
- Features: automated KPI analysis, one-click PDF reports, interactive dashboards with trend charts and anomaly detection, and a multi-tier subscription model.

Anvil | Under Development

Founder & Lead Developer | Flutter, .NET, PostgreSQL

- Cross-border fintech mobile app enabling seamless international money transfers, with recipients automatically receiving funds in local currency and no manual conversion step.

Appointment Booking System | Delivered

Backend Developer | ASP.NET Core 8, PostgreSQL, JWT, SendGrid

- Scalable, multi-industry booking platform serving health clinics, beauty salons, and hospitality, with multi-role access and automated confirmations via SendGrid.

Hospital Management System | Delivered

Full-Stack Developer | Node.js, PostgreSQL, Express, Firebase Auth

- Multi-role Hospital Management System covering patient registration, appointment scheduling, multi-tier billing, and pharmacy inventory tracking.
