ATTRIBUTES

- Problem-Solving
- Agile / Scrum
- Technical Writing
- Clean Code
- API Architecture
- Client Engagement
- Deadline-Driven
- Collaborative

PROFESSIONAL SUMMARY

Results-driven Backend and Full-Stack Developer with 4-5 years of experience building secure, high-performance systems across AI health platforms, fintech, education, and transport. Proficient in C#.NET, Python, Django, ASP.NET Core, Node.js, Next.js, React.js, EF Core, and PostgreSQL. Skilled in designing scalable REST APIs, implementing JWT authentication and RBAC, integrating AI model pipelines, and architecting compliant backend systems. Currently engineering AI-driven healthcare products at Techserv Intelligence.

WORK EXPERIENCE

Software Engineer

May 2026 – Present

Techserv Intelligence | Enugu, Nigeria (Remote)

- Building and maintaining backend services for Clinex and Vitalink, AI-driven healthcare products, using C#.NET, React, and PostgreSQL.
- Collaborating with cross-functional teams to architect scalable APIs and implement secure, role-based access control across platform modules.

Founder & CEO

Jan 2024 – Present

Forge | Kano, Nigeria

- Architected Forge solo — an AI-powered bulk payment and disbursement platform for African businesses, using Python (AI layer), .NET backend, React frontend, and PostgreSQL.
- Engineered intelligent account validation reducing bulk payment failure rates to near zero across large-scale datasets.
- Navigated pre-seed fundraising, investor negotiations, and accelerator applications while managing end-to-end product development.
- Produced full investor-facing materials: pitch deck, financial model, investment memo, and product demo.

Backend Developer

Jun 2023 – Present

Hubuk Technology Limited | Kano, Nigeria

- Architected and deployed scalable REST APIs with ASP.NET Core, reducing dev cycle time by 25%.
- Engineered JWT authentication and RBAC systems securing access across all platform modules.
- Delivered budgeting, payments, and analytics dashboards powered by PostgreSQL and EF Core.
- Drove Agile ceremonies across frontend, backend, and mobile squads; authored full technical documentation.

Frontend Developer Intern

Sep – Oct 2025

Torvix AI | Remote, India

- Developed reusable React.js components for an AI-powered workflow automation platform.
- Optimised component state management and improved performance across key automation modules.

Backend Engineering Intern

Sep – Dec 2025

FlexiSAF Solutions Limited | Abuja, Nigeria

- Built backend features in Java and Spring; wrote optimised SQL for enterprise-grade modules.
- Collaborated with senior engineers to deliver secure, maintainable internal APIs and tools.

EDUCATION

B.Sc. (Hons) Computer Science

Mar 2020 – Sep 2025

Aliko Dangote University of Science and Technology, Kano, Nigeria

Graduated with Honours. Coursework covered data structures, algorithms, software engineering, database systems, computer networks, and mobile application development.

TECHNICAL STACK

- Languages
- C# | Python | JavaScript (ES6+) | SQL | Java
- Frameworks
- ASP.NET Core | Django | EF Core | Node.js | Express.js | Next.js | React.js | Spring
- Databases
- PostgreSQL | Firebase Firestore
- Tools
- Git | GitHub | VS Code | Visual Studio | Postman | Swagger
- Specialisations
- REST API Design | JWT Auth | RBAC | AI Model Integration | Agile / Scrum | Health Data Compliance

KEY PROJECTS

Vitalink

Software Engineer, Techserv Intelligence | C# .NET | React | PostgreSQL In Development

- Smart patient monitoring and vital signs tracking platform with real-time health data pipelines.
- Implements clinical alerting systems and role-based clinician dashboards for care teams.
- Integrates with Clinex, Techserv Intelligence's broader AI-driven healthcare ecosystem.

Forge forgeapis.xyz

Founder & CEO | Python | .NET | React | PostgreSQL Pre-Launch

AI-powered bulk payment and disbursement platform for African businesses. The Python AI engine validates and auto-corrects bank account details (wrong numbers, mismatched names, duplicates, bank name normalisation) then disburses clean data with near-zero failure rate. Founded after personally managing a 30,000-beneficiary disbursement requiring weeks of manual cleaning.

Anvil

Founder & Lead Developer | Flutter | .NET | PostgreSQL Under Development

Cross-border fintech mobile app enabling seamless international money transfers. Senders in Nigeria or any country initiate a transfer and recipients automatically receive funds in their local currency, with no P2P exchange or manual conversion step. Built as a product under Forge, targeting the African remittance corridor.

BizScan360 bizscan360.com

Lead Developer | Next.js | Node.js | PostgreSQL | REST APIs Live - 2,800+ Users

Business Health Evaluation Platform trusted by 500+ growing businesses worldwide. Ingests complex financial data and produces a clear 0-100 Business Health Score. Features: automated KPI analysis, one-click PDF reports, interactive dashboards with trend charts and anomaly detection, and a multi-tier subscription model.

Kredinou kredinou.com

Lead Developer | Next.js | Node.js | PostgreSQL | REST APIs Live

Modern fintech platform providing credit scoring, loan management, and financial solutions. Designed and implemented the complete full-stack infrastructure. Key decisions: end-to-end encryption, RBAC for admin and applicant roles, PostgreSQL optimisations, and modular API architecture for future mobile integration.

Appointment Booking System

Backend Developer | ASP.NET Core 8 | PostgreSQL | JWT | SendGrid Delivered

Scalable, multi-industry booking platform serving health clinics, beauty salons, and hospitality. Supports multi-role access, dynamic service and slot configuration, real-time availability checks, and automated confirmation emails via SendGrid. Designed for multi-tenancy.

Hospital Management System

Full-Stack Developer | Node.js | PostgreSQL | Express | Firebase Auth Delivered

Multi-role Hospital Management System digitising core clinical and administrative workflows. Covers patient registration, appointment scheduling with conflict detection, multi-tier billing, pharmacy inventory tracking, and real-time staff dashboards with role-based views.
